THERE'S LACE ENOUGH
NOW—EVEN FOR NAVY

Washington, July 26.—The naty has more than enough gold
lace now.
A shortage which developed when factories in occupied French
cities ceased exports has been so completely offset by American manufacturers that a surplus exists, the navy reported today.
Normally the navy requires about 20,000 yards—the equival lent of 10 sea miles—of half-inch
gold lace for officers' uniforms.
The ginner who does a thorough job goes over all his machinery of the glory of God' (v. 2). The Christian has the forward look. His future is as bright as the bearings, hanger, and other parts for needed repairs and then makes shout 20,000 yards—the equival lent of 10 sea miles—of half-inch gold lace for officers' uniforms.
The current expansion has added everal miles to reserve stocks,

POWER CURTAILMENT SUSPENDED UNTIL SEPTEMBER 1st

Except for the greatly increased demands for power for defense needs, it would not have been necessary to ask for any curtailment in the use of electric service. Despite deficient rainfall for more than a year, we would have been able to supply enough current for all normal needs. We regret the inconvenience which the necessity for power curtailment has caused our customers. Therefore, we are pleased to report that recent rains and prospects for further improved river and hydro-electric storage conditions in the Southeast made it possible on July 23 to suspend immediately the power curtailment program until September 1, 1941.

Notice To All

Alabama Power Company Customers

It should be remembered, however, that hydro-electric storage reservoirs are still far below normal for this time of the year, and that the demands for power by National Defense industries in the Southeast continue to increase. Consequently, it may be necessary again to request voluntary curtailment in the use of electricity about September first.

A factor which contributes to the suspension of the power curtailment program is daylight saving time in the Southeastern States instituted at the President's request. This will help conserve electric energy.

Every person who during the past two months has helped, either by reducing his use of service, or by working nights and Sundays instead of regular day-time shifts, may have the satisfaction of feeling that he has contributed to the success of the National Defense effort which all parts of our Country are making.

ALABAMA POWER COMPANY

Should it again become necessary to resume curtailed schedules, you may be assured that they will be continued no longer than the needs of National Defense demand.

I have never seen so many cars on the highway as I did Sunday.

Where were they going and why run so fast? I do not think many of them were going to church.
